Email: harshgoyal190720@gmail.com
 Mobile: +91 94642188078

SKILLS

- **Languages:** C, C++, Python, JavaScript, HTML, CSS, SQL
- **Technologies:** React.js, Tailwind CSS, Google Authentication, Node.js fundamentals, Embedded C++, IoT
- **Databases/Tools:** MySQL, Git, GitHub, VS Code, Arduino IDE, Notion, Figma
- **Soft Skills:** Problem solving, Team collaboration, Technical mentorship, Content creation, Time management

PROJECTS

- PlaceIQ (AI-Assisted Career Readiness Platform) | [GitHub](#)

May 2026 - Jun 2026

 - **Built an AI-assisted career readiness platform** designed to evaluate student profiles against target company skill benchmarks.
 - **Engineered automated resume parsing** and skill-gap analysis pipelines identifying core technical deficiencies prior to job applications.
 - **Structured tailored 6-step interview pathways** integrating company-specific profile assessments and interactive mock evaluations.
 - **Tech Stack:** Python, NLP, React.js, JavaScript, Tailwind CSS, REST APIs, Git
- TGPA Calculator (Semester Academic Utility) | [GitHub](#)

Dec 2025 - Jan 2026

 - **Developed a responsive web application** enabling students to accurately calculate semester TGPA and projected CGPA metrics.
 - **Integrated Google OAuth 2.0 authentication** allowing secure user login and persistent cloud/local grade record synchronization.
 - **Designed dynamic credit-grade calculation algorithms** supporting various university grading scales and instant GPA projections.
 - **Tech Stack:** React.js, JavaScript, Tailwind CSS, Google OAuth 2.0, HTML5, LocalStorage
- Arduino Based Surveillance & Monitoring System | [GitHub](#)

Nov 2025 - Dec 2025

 - **Engineered a compact embedded security system** combining ultrasonic proximity detection and environmental monitoring with Arduino UNO.
 - **Integrated HC-SR04 SONAR (2–400cm range)** and DHT11 temperature/humidity sensors with active buzzer alarm on Digital Pin 8 polling every 500ms.
 - **Implemented I2C 16x2 LCD display readouts** at address 0x27, achieving 99% real-time threshold detection accuracy.
 - **Tech Stack:** Arduino UNO, Embedded C++, HC-SR04 Ultrasonic Sensor, DHT11, I2C LCD, Active Buzzer

CERTIFICATES

- Programming Fundamentals using Python - Part 2 | Infosys Springboard

Jul 2026
- Design Thinking and Innovation | IIT Bombay & Coursera

Jul 2026
- Computer Programming in C (150 Hours Course Duration) | NeoColab • iamneo & LPU

May 2026
- ESL002: Intermediate English as a Second Language | Saylor Academy

Jan 2026

ACHIEVEMENTS

- **Academic Distinction:** Maintained a top-tier CGPA of 9.31 in B.Tech Computer Science & Engineering at LPU.
- **Technical Content Creator:** Founded Harsh Codes YouTube channel; authored Python 21-Day Bootcamp & CSE Placement Guides.
- **Rigorous Problem Solving:** Completed 150+ hours of structured programming in C, C++, and Python.
- **Hands-on Engineering:** Architected 5+ full-stack, AI, and IoT hardware projects independently.

EDUCATION

- Lovely Professional University
 Bachelor of Technology - Computer Science and Engineering; CGPA: 9.31

Phagwara, Punjab
 Aug 2025 - Present
- Bhai Mastan Singh Public School
 Higher Secondary Education (12th); Percentage: 75.8

Muktsar, Punjab
 Mar 2024 - Mar 2025
- D.A.V. Public School
 Secondary Education (10th); Percentage: 90.6

Muktsar, Punjab
 Mar 2022 - Mar 2023
